

AgSafe® Throw-Tabs™ 3-0-6 Pond Plant Food Tablets

Just Throw Tablets Into Pond and Watch Plants Grow...It's that Simple!

AgSafe® Throw-Tabs™ Pond Plant Food Tablets with High Iron and Micronutrients is the easy way to feed all types of waterlilies, floating, and submerged pond plants. Just throw our convenient tablet into the pond water near the pond plant to feed your plants – No more hassles of getting wet and into your pond to feed your plants – No more measuring of liquid plant stimulates – No more green water and algae from ordinary plant food tablets and spikes. The Easiest and Most Efficient Way to Feed Your Pond Plants.

How Throw-Tabs™ Pond Plant Food Tablets Work

AgSafe® Throw-Tabs™ sink to the bottom of the pond where they slowly dissolve near the pond plants and feed for up to 2-3 weeks. Throw-Tabs™ contain special slow-dissolving water soluble fertilizers, micronutrients, sea minerals, and organic additives to feed all types of waterlilies, floating, oxygenating, and submerged pond plants. Ideal for feeding water hyacinths, clover, poppy, lettuce, parrot feather, anacharis, etc. Small amounts of ammonium sulfate supply quick release nitrogen for the pond plant to get a rapid start. Needed quantities of potassium and micronutrients complete the formula and provide an ample reserve of all major elements except phosphate. Some ponds and waterways already have high levels of phosphates and do not need more phosphates added to the formulation. Pond plants can obtain most of their phosphate requirements directly from pond fish waste and from the water supply. In addition, there are no copper additives in the formulation. Copper tends to accumulate in the ecosystem and affect snail populations.

ADDITIONAL BENEFITS:

- o High 6% Magnesium to assist in growth and chlorophyll production.
- o High 6% Iron to correct and prevent leaf iron chlorosis (yellowing).
- o Potassium and Magnesium 1:1 ratio best for pond plant metabolism.
- o Chelated Micronutrients for fast plant assimilation of needed elements.
- o Natural Humic Acids to promote better rooting, regulate pH, and provide an organic substrate for plant rooting.
- o Plant Extracts to supply 76 trace marine minerals, natural saponins, and rapid growth hormones.
- o Fish Extracts to provide a good source of plant vitamins and hormones.
- o Contains NO Nitrates and NO Free Phosphates that can cause algae blooms and cloudy green water.
- o Fish Safe and Will Not Harm Aquatic Life.

Product Sizes & General Uses

A136 Small Retail Blister Case

30 Tablets (5g) per Blister

24 Blisters per Case

Ideal for Beginner Pond Owners

A139 Retail Bottle Case

300 Tablets per Bottle

4 Bottles per Case

Ideal for Medium Size Pond Owners

A142 Grower & Landscaper Bulk Case

2100 tablets per Case

For Large Growers and Landscape Pond Maintenance

Information regarding the contents and levels of metals in this product is available on the internet at <http://agr.wa.gov>

NON-PLANT FOOD INGREDIENTS: 3.0% Humus (1% Humic Acids) from Humus Shale Ore. Proprietary Blend of Plant & Fish Extracts.

SUGGESTED APPLICATION

New Plantings: Insert the recommended number of Throw-Tabs™ into aquatic potting soil 2-3" deep near plant root ball area during planting. Apply the recommended number of Throw-Tabs™.

Container Size	2 inch Starter	4 inch	6 inch	1 – 2 gal.
Number of Tablets	1 tablet	1-2 tablets	2 tablets	2-3 tablets

For 3 gallon or larger container plants – apply one tablet per gallon. Feed again after 2-3 weeks as an established plant.

Established Plants: Just throw tablet(s) into pond water near center of pond plants. Apply one Throw-Tab™ for every 3 ft. of pond plant spread whether floating or submerged. Repeat feeding application 2-3 weeks during growing season or when needed. Some pond plant varieties like Lotus, Iris, etc. are heavy eaters and may require more frequent feeding or more tablets. Bog and other sensitive pond plants may require less feeding frequencies or half tablet dosages.

NOTE – When applying in Free-flowing Rivers and Water-ways – only apply tablets near shoreline pond plants not directly into free-flowing waters.

ARCHITECT SPECIFICATIONS AND LANDSCAPE CONTRACTOR COMPLIANCE

AgSafe® Throw-Tabs™ meets and/or exceeds architect and government specifications for a non-phosphate pond plant food. Also, reduces the risk of algae blooms and green water cloudiness if used as directed. AgSafe® Throw-Tabs™ are one of the easiest and most cost effective ways for landscape contractors to feed all types of pond plants with minimum material and labor costs. AgSafe® Throw-Tabs™ are readily available from local aquatic nurseries or can be directly purchased in bulk from AgriTab Corporation or online from www.agritab.com.

The landscape contractor shall demonstrate architect specification compliance by showing invoices to prove the purchase of the AgSafe® Throw-Tabs™ in sufficient quantity to cover the entire landscape project at the recommended application rates. In order to achieve best results, the above recommendations should be written into architect plans and specifications to be followed closely by the landscape contractor.

CAUTION: Keep Away From Children and Pets. Do Not Swallow or Ingest. Store in Cool Dry Place. Not For Aquarium Use. When applying in rivers and waterways – feed plants near shore line only, not directly into free flowing waters. Follow Directions as Labeled with Product.

DISCLAIMER & LIMITED WARRANTY

The above information provided herein is, to the best of AgriTab Corporation knowledge, accurate and reliable, and is intended to provide general use information. AgriTab Corporation makes no warranty or guarantee, expressed or implied, as to the accuracy or reliability, and shall not be liable for any losses or damages arising from the use of this product. AgriTab Corporation shall not be liable for any damage or injury resulting from improper use, from any failure to adhere to above said recommendations and practices, or from any improper hazards inherent in the use of this product. As with any fertilizer product, we suggest fertilizer trials be performed to determine proper feeding methods and rates for your specific applications. The full liability of the use and handling of this product is the sole responsibility of the User or Buyer. The limited warranty of this product only covers the fertilizer guaranteed analysis and its components. Defective product is remedied to the User or Buyer for only the replacement cost of the product.
